STONY PLAIN SUN.

VOLUME TEN.

STONY PLAIN. ALBERTA. THURSDAY. AUG. 8. 1929

Whole Number 470

Produced 15 tons of milk

Strathmore Sylvia, prize pure-bred Holstein from the Canadian Pacific Railway Experimental Farm at Strathmore, Alberta, held the record of all Canada last year for her production of 25,771 pounds of milk and 1287 pounds of butter. She had her day-out at the Calgary Exhibition and Stampede at Calgary recently, when with others from the herd of 600 at the farm she was admired by thousands of visitors. Just to impress on them what she had done, 270 eight-gallon milk cans were arranged around the entire Canadian Pacific Holstein exhibit, these bearing the number required to hold the milk Sylvia produced. 1287 one-pound butter cartons formed an arch at one end, emphasising her butter production.

Sunday's Missionfest.

A Mission festival was held on Sunday last at St. Matthew church (Missouri Synod). Rev. Eberhardt, pastor, when addresses were given—in German, in the afternoon, by Rev. C. Thies, director of missions; and in English, in the evening, by Rev. A. J. Mueller, of Edmonton. A very large number was present, despite the unfavorable weather.

On the New Speedway.

The new bridge over Big Horn creek, on the Baseline at Meridian road, has been completed, giving a little wider space for the passage of autos: but, at that, it is claimed the bridge's clearance is too narrow for the use of the fast traveling public.

It is noticed that, since the new grading on the Baseline has been completed, that the drivers of a lot of cars using the Highway pay no heed to the speed limit, and, consequently, the number of accidents are increasing. One reason is, the new narrow grade gives the timorous drivers no chance, as formerly, to pull out of the way when an oncoming speeder is sighted.

A Disastrous Fire.

A fire occurred late Friday night or early Saturday morning on the farm of Mr. M. Poemerl, north Glory Hills, which entirely destroyed his sawmill.

The mill gang had been operating the planing machine on Friday, but closed down about 2.30 in the afternoon. The outfit is operated by steam, and Mr. Poemerl inspected the premises about 10 p.m. on Friday, and saw nothing about the place out of the usual.

On going to the mill on Saturday morning, it was found to be in ruins, with smoke issuing from the charred timbers.

There was a quantity of finished lumber on the premises, about 12,000 feet of this belonging to Mr. Poemerl; the balance being owned by other parties. A wagon with a special order of planed flooring which was standing by the planer was consumed, with the vehicle on which it was loaded, all that was left being a neckyoke.

Mr. B. Miller, who lost his house by fire a few weeks ago, had the material for his new house at the mill, ready to be hauled, and this also went up in smoke.

Mr. Poemerl is unable to account for the accident, as the prevailing wind that night was from the west, and the wood-burning steam engine was standing to the east of the mill. There had been no other fire operated at the mill other than the engine.

Mr. Poemerl estimates his loss at between \$3000 and \$4000, with no insurance.

Reform Of Electoral Methods

Recent elections in Great Britain, in Canada, and more recently still in the Province of Saskatchewan, all seem to point in the same direction, and that is to a change in the system or methods of choosing Parliamentary representatives. For many generations the underlying principle of the British system of responsible government has been ruled by the majority of the people as indicated by their selection of party representatives in the House of Commons or Legislative Assembly, as the case may be. And such representatives were chosen, for the most part, by constituencies represented by a single member. So long as the electorate was divided into only major parties or groups of political thought this system worked fairly well, although it was never wholly representative of public opinion.

Now, however, that the two-party system has been, or is being, replaced by three and sometimes four or more parties, the weaknesses of the old system have become apparent, and the old principle of rule by majority is rapidly becoming impossible of realization. On the contrary, at Westminster, at Ottawa, at Regina, each party represented in Parliament is a minority party, and in each instance the smallest of these minority groups holds the balance of power. In each of the legislative bodies referred to, the group having the largest representation in the House constitutes the government party, but at any moment, and on any question that may arise, the government may suffer defeat and be called upon to give place to another minority group.

With the exception of the United States where the two-party system continues in favor, partly, perhaps, because it is so interwoven into the whole fabric of government, national, state, municipal, even county and judicial, it appears to be giving way throughout the world. In Germany, France, Belgium, and other countries having responsible government, government is only possible by a coalition of parties, or a working understanding between them. Admittedly, it does not make for strong government or stability in government, France being a notable example.

The multiplication of political parties or groups has, in most European countries, brought about a change in electoral methods. In some, single member constituencies have been abolished, the single transferable ballot, or Proportional Representation adopted, or the second election system inaugurated. Even in the United States the primary system almost amounts to a second election. In a word, it is recognized that the single member constituency where a mere plurality of votes is sufficient to elect, regardless of the number of candidates in the field, no longer meets the needs of the situation.

And it is becoming increasingly evident that it will not for long prove acceptable to the people of Great Britain, or Canada, or in the Provinces of Canada. Opponents of Proportional Representation have always argued that it tends to a multiplication of parties or groups, but the fact now has to be faced that this multiplication has taken place under the existing system. The system itself, therefore, must be altered to meet the changed conditions.

Most politicians will not welcome any change, but they cannot prevent it. The important question is—What basis of representation and method of voting shall be adopted to best meet the needs of the new conditions that have arisen? Already the subject is engaging the attention of political students in Great Britain, and it is confidently predicted that the unwritten constitution of the Old Country will, perhaps, undergo some change. Occupying the commanding position he does in the present Parliament, and suffering the handicap of a much smaller representation in the House of Commons than the vote polled by his candidates in the country justly entitles him to, Lloyd George will not long remain content with things as they are. He can, and probably will, demand as one price of his continued support of the Ramsay MacDonald Labor Government a reform of electoral methods and machinery which will accord full value to every individual vote cast, and not place third or fourth party candidates at a distinct disadvantage.

Whether the solution is to be found in larger multiple-member constituencies replacing the present single-member seats, with the adoption of the single transferable ballot, or even Proportional Representation, or in a complete change in the accepted form of cabinet responsibility, involving a fixed term for Parliaments and Legislatures, denial to a government of the right of dissolution except upon a straight vote of want of confidence, and the formation of a cabinet consisting of representatives of all groups, and based upon their respective numerical strength in the House, time alone will disclose.

One thing, however, may be accepted as sound, and that is that the genius of British statesmanship which in the past evolved the best form of democratic government the world has yet known will be capable of meeting the new situation and solving the problems which it presents.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Plane in Freak Accident

Strikes Steam Roller in Making Landing At Roosevelt Field

When an aeroplane and a steam roller collided at Roosevelt Field, N.Y., the accident ruined the plane and injured the operator of the roller.

James Riddle, piloting a small monoplane in which two friends were riding as passengers, chose for his landing a part of the field which is being levelled off and on which two steam rollers were at work, hidden from the air by the cloud of dust they raised.

The descending plane took off the smoke stack of one of the rollers and bowled the operator, A. C. Madberal, from his seat, breaking his shoulder.

The plane crashed, tearing off the left wing, and otherwise damaging it beyond repair, but Riddle and his passengers escaped without injury.

NEW HEALTH FOR

TIRED-OUT WOMEN

Found in the Rich, Red Blood Dr. Williams' Pink Pills Actually Make

Anemia comes on gradually, beginning with languor, depression of mental or bodily exertion, irritability and a feeling of fatigue. Later comes the palpitation of the heart, headaches, frequent backaches and often disturbed digestion and an inability to obtain rest at night. Cases of this kind, if neglected, become more serious, but if taken in time there is no need to worry. Dr. Williams' Pink Pills, which are free from any harmful or habit-forming drug, are just the tonic needed to remedy this wretched state of health. These pills actually make the rich, red blood that stimulates and strengthens every organ and nerve in the body. Thus strength and activity return, the appetite improves and the restless sleep is had. Dr. Williams' Pink Pills can and will do is shown by the case of Mrs. D. B. Fanning, Seal Harbor, N.S., who says: "I was in a badly run-down condition. I was pale, my appetite was very poor, and the least exertion would leave me completely tired out. In fact I was hardly able to do much work about the house. I tried to try Dr. Williams' Pink Pills and after taking a few boxes can truthfully say I had gained greatly in health and strength and was able to go about my work with no sign of the former weakness. I cheerfully recommend them to all others who may be in a run-down condition." You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Plant Grows Leaves

After Having "Sleep"

Replaces Withered Foliage In Fifteen Or Twenty Minutes

After "sleep" of from 15 to 20 minutes, a plant, recently developed in Germany, produces new leaves. So sensitive is it that if the leaves are touched, or a match burned near them, they immediately wither and fall off. In about a quarter of an hour after the withered leaves have dropped off, new ones grow out. The plant is a member of the mimosa family. It grows in great quantities in India, where it is gathered and sold for commercial purposes. The bruised leaves are said to have a high medicinal value in healing burns.

Recognized as a leading specific for the destruction of worms, Mother Graves' Worm Exterminator has proved a boon to suffering children everywhere. It seldom fails.

Keeps a Mouse Farm

Have you ever heard of a mouse farm? There is one at Rayleigh, in Essex, where mice are reared just as cattle and sheep are on ordinary farms. There are 50,000 mice, and of nearly every color. Yet, although there are so many, Mr. Peck, the farmer, can put his hands on any one of them at a moment's notice. About three hundred young ones are born every day, and it takes five hours to feed them all. They are sold to colleges and hospitals for experiments.

Canada's Iron-Making Centres The three iron-making centres in Canada are: Sydney, Nova Scotia, on the Atlantic Coast, and Hamilton and Sault Ste. Marie in the province of Ontario.

U.S. To Reduce Military Expenses

President Hoover Says Military Budget Now Greater Than Any Other Country

President Hoover intends to establish a commission of army officers within the general staff to see what can be done toward reducing military expenditures.

The commission, the president said recently, would be charged with making an enquiry to determine what has been made obsolete by scientific advancements and could be done away with, and what army programmes can be spread over longer period than originally intended and at the same time maintain complete and adequate preparedness.

The president said the purely military expenses of the United States constitute a military budget greater than that of any other nation and at a time when he considers there is less danger of war than at any period within the last fifty years.

It is now estimated, he said, that the military outlay for 1923 will be \$805,000,000, which is \$120,000,000 more than the similar expenditure for the fiscal year just closed, and compares with an average pre-war expenditure for military activities of the army and navy of \$266,000,000 annually.

Laudable Movement Has For Its Object the Interpretation Of British and Canadian Music

Fashion has its place in music as well as other things, and fashion has had much to do with the neglect of British music. Until the beginning of the seventeenth century, English music was celebrated throughout Europe. John Dunstable was the greatest composer of the fifteenth century, while in Elizabeth's time John Dowland and John Bull were musicians coveted by foreign courts. Then came a time of Italian music followed by another tide from France. The titanic genius of Handel favoured by Hanoverian kings made England musically a German province for at least a hundred years, and as Germany and Austria produced a marvelous succession of composers, it was difficult, indeed, for the British musician to raise his head. Then came a deluge of Slav music with a recrudescence of French influence to swamp any British renaissance.

With the twentieth century, however, the situation has changed. The English madrigal, luteist and church music of the Elizabethan period was unearthed and made known through the enterprise of scholars such as Dr. E. H. Fellowes. The immensely rich field of British folk music was at the same time coming to be realized, and in this field the British musician found an inspiration which has resulted in compositions of new vitality and distinction. Marjory Kennedy Fraser, for instance, in her arrangements of the "Songs of the Hebrides," has done work of intense appeal, while in compositions based on English folk-song the name of R. Vaughan Williams is internationally known. Indeed, the firmament of modern music is dotted with British stars, whose names perhaps have sometimes a Continental ring, but whose birth record is unimpeachably British—such names as Elgar, Stanford, Patti, Delius, Holst, Cyril Scott, Arnold Bax and Dame Ethel Smyth. Music in order to live must be performed, and therein lies one of the handicaps of the British composer. So many players and singers

have been schooled on purely Continental European classics that concert and operatic audiences do not get much opportunity of hearing anything else. New York is the mecca of the European concert and operatic artist, and Canada gets its quota of New York artists on tour. This gives us a great deal of good music, but mostly music of Continental Europe, the percentage of British music being almost negligible.

It is, therefore, in the national interest that Canadians should have more opportunity of hearing the music which is their legitimate heritage, and with that end in view the music department of the Canadian Pacific Railway has organized a series of concert tours with artists of distinction who will interpret British and Canadian music to Canadian audiences. For practical considerations, Canadian Pacific hotels in six large cities have been chosen for this series.

The scheme has the warm approval of leaders in the Canadian musical world, such as Dr. Ernest MacMillan, Principal of the Toronto Conservatory of Music.

Canada has so recently emerged into nationhood that any large output of distinctively Canadian music could hardly be expected. There is, however, a rich store of folk songs, particularly in the Province of Quebec, retained by tradition from the early settlers of New France and so adapted to Canadian life as worksongs that they have assumed a colour and quality of their own. There are, too, a number of young Canadian composers whose work is obtaining recognition by international publishers. Among the interpreters of music, Canadian singers and players are to be found among the foremost in London, Edeg, Paris and New York, while the Canadian ensemble known as the Hart House Quartette, is second to none.

The first recital of the series will be given by Marjory Kennedy Fraser, the gifted woman who sings in beautiful fashion the lovely songs of the

Hebrides, which she has given to a musical world. She will be accompanied by her sister, Margaret Kennedy, a well-known teacher, who was given the honorary degree of A.R.A.M. for her services as lecturer on harmony at the Royal Academy.

The second concert is that of Stanley Maxted, brilliant tenor of Montreal, and Mary James, soprano star of the Banff Scottish Festivals. The third group is composed of Florence Hood, an English violinist, now living in Montreal, and Jean Rowe, lyric soprano of Toronto. Rudolphe Plamondon, French-Canadian tenor and his son Lucien, cellist, will be another group, the Hart House quartette the fifth, and John Goss, an English baritone, will complete the series.

Marjory Kennedy Fraser and her sister will start their tour at the Empress Hotel at Victoria, September 12, after the Banff Scottish Festival at which she will be one of the principal artists. Her other concerts in the trans-Canada tour will be given at Vancouver, Sept. 16; Calgary, the Hotel Palliser, Sept. 21; Regina, the Hotel Saskatchewan, Sept. 23; Winnipeg, the Royal Alexandra, Sept. 26, and the Royal York at Toronto, Sept. 30.

Value Of Sleep

Possible To Live Longer Without Food Than Without Sleep

Science has evolved drugs that will put one to sleep, but just what it is that brings natural sleep is as great a mystery today as it was to the cave-man who curled up on his rock mattress with his flowing beard spread over him for a quilt. It is a commentary on human nature that we are more particular about our food than we are about regular hours of sleep, yet it is a fact, definitely established, that it is possible to live much longer without food than without the benign embrace of Morpheus.

Hamilton Spectator.

Alberta Pool Interim Payment
One dollar a bushel will be the interim payment on wheat for grain delivered to the 1928-29 crop, according to an announcement made at the Alberta Wheat Pool offices in Calgary. Last fall when a bad slump in wheat prices occurred the initial payment was lowered from \$1 to 85 cents, but the previous interim payment will be issued this fall.

Western Coal Operators Are Interested In Railway Board Hearing On Freight Rates

Western coal operators, according to their head, W. W. McBain, are wholeheartedly behind the joint action of the provinces of Alberta and Ontario in requesting a further Railway Board hearing on the subject of freight rates.

Formal application for this hearing has just been made by J. Earl Lawson, of Toronto, counsel for the two provinces.

"Considerable quantities of domestic fuel were shipped to Ontario during 1928," Mr. McBain says in explaining the situation, "under the Order-in-Council providing a temporary freight rate of \$6.75 per ton. The Federal Government undertook to secure the railways against loss in hauling the coal and the Order-in-Council authorized the Board of Railway Commissioners to name what amount, if any, was due to the railways after the conclusion of each seasonal movement, of which the 1928 one was the first.

"Now, as we understand it, the railways are applying to the Board for definite payment per ton on the coal hauled last year. As the coal operators view the matter, the chief reason for carrying on these experiments in coal transportation is in order to ascertain after a period of years, exactly what it does cost to bring coal into Ontario, from the west. The Order-in-Council, as we read it, states this in the plainest terms.

"The statements which have been submitted to the Board," Mr. McBain continued, "apparently take a different view of the matter and disregard the actual or out-of-pocket cost of hauling the fuel. Ontario and Alberta have made a submission to the Board, to this effect, asking for a hearing on the question and requesting that the two roads furnish the Commissioners with this further information."

Mr. McBain pointed out that the stand taken, both before the Senate Committee in 1923, and the Committee of Mines and Minerals of the House of Commons, was that a distinctively Canadian fuel policy, which

would tend to provide for the needs of Canadian consumers from the output of Canadian mines, would be very much in the national interest. Alberta has sufficient coal resources to provide for the Dominion's needs for eighteen centuries. Ontario pays into the pockets of American operators and railroads approximately thirty millions annually as a result of her purchases of anthracite in this foreign market. It would be greatly in the national interest to keep this money in Canada, and the problem of doing so boils down to one of transportation.

"It has been taken for granted," Mr. McBain stated, "that the great economic importance of a national fuel policy put the matter on a different plane from any ordinary discussion of haulage costs, and that some scheme might properly be worked out under which fixed charges, which the railways must meet in any case, and which go on just the same, whether fuel is hauled or whether it is not, would not be assessed against the coal movement, particularly so, since the coal would be carried during the off-peak grain season, and in cars which would otherwise be lying idle on the sidings.

"Naturally, any such rate must also be fair to the railways," Mr. McBain said, "but the first necessity preliminary to the consideration of a permanent arrangement is definite knowledge of what it does actually cost to get two great transcontinental roads to bring the coal east. That is what the two provinces are asking the Board of Railway Commissioners, at Ottawa, to find out, and an investigation, with that end in view, was requested by the Order-in-Council of last year.

"When Mr. E. P. Mallory, the expert of the National Lines, appeared before the Senate Committee in 1923," Mr. McBain declared, "he gave \$8.91 per ton, as the out-of-pocket cost, and subsequently, a telegram to the Committee from Sir Henry Thornton, made the offer to carry the coal at \$9 per ton. At that time, operating costs were higher than they are today, as the reports of the railways show, so that it is logical to suppose that the cost now is less than it was at the time the suggest of a \$9 rate was made.

"In September 1927, two reports on the out-of-pocket cost were made by the Board of Railway Commissioners following an official inquiry into costs. The majority report found the out-of-pocket cost of coal transportation to be \$7.22 per ton, while the minority report gave a figure of \$6.50 per ton. The operating costs on which these calculations were based were also higher than those of the present time.

"But we are informed," Mr. McBain concluded, "that, on the basis of the 1928 coal movement, one statement gives \$15.03 per ton as the amount claimed or, in other words, the difference between \$6.75 and \$15.03 as the sum per ton which the government should pay.

"This is not only much higher than either the \$7.22 or \$6.50 Railway Board out-of-pocket figures and well above the \$9 offer of 1923, but it is even \$3 per ton higher than the average rate for all commodities for the distance which the coal was moved."

Swedes Are Original.

The Swedes have made great advances recently. Unlike other nations they are not slavishly following Anglo-Saxons. They are developing a civilization of their own. A Swede controls the world match market. Another Swede, a lady, has won the Nobel prize for the best novel. Another Swede is one of the two chief radium experts in the world, and still another is recognized as one of the greatest modern architects.

The Bride—Are you sure your marriage service is just as valid as any other?

The Justice of the Peace—More so. Remember, you promised to obey this man, and if you don't I can fine you for contempt of court.

W. N. U. 13791

TO TOUR CANADA

The British artists who will tour Canada during the coming fall and winter, under the auspices of the Canadian Pacific Railway. The object of this series is to show Canadians the vast amount of splendid British music available and familiar in the Old Land. (1) Florence Hood, violinist

of Montreal; (2) Marjory Fraser, famous collector and interpreter of Hebridean music; (3) Mary Frances James, young dramatic soprano; (4) Stanley Maxted, English tenor, now resident in Montreal; (5) John Goss, English exponent of Chanterley and modern English songs; (6) Rudolphe Plamondon, well-known French Canadian tenor.

A Master Scientist

Dean Boyle, of Alberta University, Accepts Post On Research Council

It may be assumed that when the National Research Council of Canada is able to attract to its staff scientists of the calibre of Dr. R. W. Boyle, M.A., Ph.D., dean of the faculty of physics and applied science at the University of Alberta, who has accepted the post of director of the physics and engineering division of the Council, it will, before long, be able to give a very good account of itself.

Dean Boyle, although only some 45 years of age, is already one of Canada's foremost scientists, ranking not far behind Professor J. C. McLenahan, of the University of Toronto. During the war he showed that he was no mere theorist in his chosen work, for he rendered important service to the British Admiralty in perfecting a device for the detection of submarines. His scientific and creative mind has also been responsible for devices for the detection of icebergs. He appears one of Canada's master scientists and it is fortunate that his services are now to be made available for Canada as a whole. The University of Alberta has now given two of its staff to the National Research Council. Dr. H. M. Tory, chairman of the council, is a former president of that institution.

Minard's Liniment for Summer Colds

Winnipeg Newspaper Union

Lady Jane Moreton, mother of Lady Byng, died at Brighton, England, very suddenly at the age of 83 years. She was the widow of Sir Richard Moreton, son of the Earl of Ducie, who died in March, 1927.

William Johnson, a powder monkey in the Crimean War, and a witness of the last hanging for naval insubordination, died recently at Weymouth, England, aged 85.

Official circles have intimated that the government was considering the possibility of voluntary curtailment of naval building as a gesture supporting building suspensions announced by Premier Ramsay MacDonald, of Great Britain, and President Hoover of the United States.

Seth R. Nicholson, observer at the Mount Wilson observatory, said a gigantic spot has been discovered near the equator of the sun. The spot, described as having eighty times the magnetic intensity of ordinary sun spots. Dr. Nicholson said, was powerful enough to cause serious magnetic storms on the earth.

566

DRAPED FLARE

A new silhouette for the youthful smart woman. It shows the raised waistline, a chic detail in all Paris frocks. The circular skirt in diagonal movement is draped at left side which is suggestive of wrapped treatment. Style No. 566 combines printed and plain cotton voile, the popular summer fabric. It comes in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. The deep slender neckline, makes it suitable for the larger woman, by placing the circularness low. Chantrelle green chiffon, tomato red crepe de chine, yellow handkerchief linen, orchid and white printed lawn, purple aere georgette crepe, printed rajah in capucine tones, and sky-blue sheer lace are distinctly smart combinations for this charming afternoon model. Pattern price 35 cents in stamps or coin (coin is preferred). Wrap coin carefully.

HIGHLY PRIZED TROPHY

This is the Beatty Trophy, presented by the chairman and president of the Canadian Pacific Railway, for inter-regimental competition among pipers of Canadian Highland Regiments, to be played for at the Highland Gathering and Scottish Music Festival scheduled to be held at Banff August 30 to September 2. The gathering brings together pipers from one end of Canada to the other, from Nova Scotia, to British Columbia, and is the greatest event of the year in Scotch-Canadian circles.

Made-In-Canada Exhibition

Will Show Public Quality Of Goods Produced In Dominion

Co-operation of various bodies with the National Produced-in-Canada Exhibition, which will be held in Montreal from November 4 to 9, already seems assured, according to reports received by the Canadian Manufacturers' Association, Quebec division, Montreal branch. "These reports," says the Gazette, "show the consensus of opinion strongly supporting the scheme to illustrate to the public, through the medium of the exhibition, the quality and diversity of goods which are produced in Canada by Canadian manufacturers for Canadians."

Sheep Shearing In Alberta

Sheep shearing in the Picture Butte District, Alberta, is now about finished. Last year there were only five flocks in the district; this year there are 23, mostly ranging in size from 35 to 150 ewes.

SUNDAY SCHOOL LESSON

AUGUST 11

DANIEL AMONG THE LIONS

Golden Text: "The angel of Jehovah encampeth round about them that fear Him, and delivereth them."—Psalm 34.7.

Lesson: Daniel 6:1-28.
Devotional Reading: Psalm 91:9-16.

Explanations and Comments

Daniel's Promotion, verses 1-3.—It pleased Darius to make Daniel one of the three presidents over his satraps, and because "an excellent spirit was in Daniel," the king thought to set him over the whole realm.

The Ingenious Plot Of Daniel's Enemies, verses 4-15.—The jealousy of the other two presidents and of all the satraps led them to try to compass Daniel's death. His record was unassailable; they saw that only on the ground of his religion could he be attacked. They then concocted a scheme so to play upon the king's vanity as to induce him to pass a law that for thirty days no one should ask a petition of any god or man save the king only—the thought he was a god to whom the whole nation must pay divine honors. Whoever should violate this decree should be cast to the lions. There was no mercy shown to the king's enemies; they were so utterly and so completely flattered and, all unassuming of the purpose behind the request, fell into their trap. Evidently he took no time for reflection, but immediately signed the law, and the law of the Medes and Persians altereth not. The unalterableness of a decree of a Persian king is frequently referred to in the Book of Esther.

"Darius illustrates the danger of adopting suggestions without considering their consequences. The probable consequences of acts which we contemplate should always be carefully considered, especially in their bearings upon others."—J. E. McFadyen.

Daniel continued his habit of prayer just as he did before the decree was issued; and not only did he pray but he gave thanks in the face of the fate he knew was approaching.

Early in the morning, before you come down into the streets of Babylon to hear its talk and breathe its impoverished atmosphere, open your windows. Look out upon the sources of strength. Wait upon it until your soul mounts up with wings like an eagle. Wait upon it until your moral nature can run upon errands of usefulness and not grow weary. Let your heart gain a fresh sense of the moral interest it cherishes toward you—and you will not be afraid of Babylon and all its lions."—Charles R. Brown.

As Daniel was consigned to the den of lions, the king said to him: "Thy God whom thou servest, He will deliver thee."

After sealing the mouth of the den with his seal, the king passed the night sleepless and fasting, and the morning hastened to the den. With "lamentable voice," a voice

quivering with grief, he cried to Daniel, "My God hath sent His angel, and hath shut the lions' mouths," answered Daniel, who was there unharmed.

A New Safety Device

Polish Filters Make Test Of Life-Saving Overalls

"Life saving overalls," designed for trans-Atlantic liners, were given successful tests in Lake Maggiore, Italy, by two Polish fliers who hope to fly from Milan to Chicago in mid-August.

The overalls are of an especially heavy rubberized fabric, equipped with valves by which they may be inflated. They will keep their wearers afloat for many days, their inventor asserts.

An added novel feature of the raiment is the equipment of electric batteries and light bulbs which will remain illuminated at least 60 hours, De Favori says.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light let strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. **WINDOLITE** is supplied in rolls any length but in one width of 86 inches only. A square yard of **WINDOLITE** weighs about 14 lbs. and a square yard of glass of ordinary thickness, weighs about 135 to 140 lbs. The improved **WINDOLITE** requires no varnish. **WINDOLITE** is made in England.

Price \$1.50 Per Square Yard, L.o.b., Toronto.

Use **WINDOLITE** and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100 % Sunlight Send for booklet "WINDOLITE"

Distributors: JOHN A. CHANTLER & CO., LTD.
51 Wellington St. W. - - - - - TORONTO, ONT.

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. **WINDOLITE** is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays, are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of **WINDOLITE** has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of **WINDOLITE** has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

DOZEN different things may cause a headache, but there's just one thing you need ever do to get immediate relief. Aspirin is an absolute antidote for such pain. Keep it at the office. Have it ready in the home. Those subject to frequent or sudden headaches should carry Aspirin in the handy pocket tin. Until you have used it for headaches, colds, neuralgia, etc., you've no idea how much Aspirin can help. It means quick, complete relief to millions of men and women who use it every year. And it does not depress the heart.

WORLD HAPPENINGS BRIEFLY TOLD

Lady Jane Moreton, mother of Lady Byng, died at Brighton, England, very suddenly at the age of 83 years. She was the widow of Sir Richard Moreton, son of the Earl of Ducie, who died in March, 1927.

William Johnson, a powder monkey in the Crimean War, and a witness of the last hanging for naval insubordination, died recently at Weymouth, England, aged 85.

Official circles have intimated that the government was considering the possibility of voluntary curtailment of naval building as a gesture supporting building suspensions announced by Premier Ramsay MacDonald, of Great Britain, and President Hoover of the United States.

Seth R. Nicholson, observer at the Mount Wilson observatory, said a gigantic spot has been discovered near the equator of the sun. The spot, described as having eighty times the magnetic intensity of ordinary sun spots. Dr. Nicholson said, was powerful enough to cause serious magnetic storms on the earth.

For Scalds Or Burns.—Dr. Thomas Electric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinarian's fee.

Commemorate Harvester Inventor

A memorial stone is to be placed on the site of the building where the first successful twin binding grain harvester was produced at Beloit, Wisconsin.

It Bids Pain Begone.—When neuralgia racks the nerves, or lumbago cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

In Mammoth Cave, Kentucky, there are fish and crayfish that have no eyes.

The cow is worshipped as a sacred animal in India.

POOL PAYMENT OF FORTY MILLION ON 1928 CROP

Winnipeg.—Nearly \$40,000,000 is being distributed as a second interim payment on wheat and coarse grains by the Canadian Wheat Pools. The basis of the wheat payment is 21½ cents per bushel No. 1 Northern, Fort William; 18 cents on No. 2; 17½ cents on No. 3; 22½ cents on No. 4; 16 cents on No. 5; 8 cents on No. 6, and 7½ cents on feed wheat. There is a wide range in the payments on other grades, varying from as high as 34 cents and 36 cents per bushel on one or two grades, down to 2 cents per bushel on the smallest parcels.

Interim payments on Durum wheats are: No. 1 Amber Durum, 15½ cents; 16 cents on No. 2; 12 cents on No. 3; 13½ cents on No. 4; 14 cents on No. 5; 6½ cents on No. 6, and 14 cents per bushel on feed Amber Durum. Last year the Pools adopted a new policy of adjusting all spreads and making deductions for elevator and commercial reserves, carrying charges, etc., from the second interim payment, and this course has been followed this year. As a result, the final payment, which will be made at the end of the crop year, will be a flat payment on all grades.

In making the above announcement, E. B. Ramsay, general manager of the Canadian Wheat Pool, made the following statement regarding the interim payment on grade six and feed wheat.

"Pool members who delivered wheat of these grades will remember that when the reduction was made in the initial payment last fall, from one dollar to 85 cents per bushel a concession was made to members delivering the lower grades to meet a very difficult situation. A larger proportion of the price of their grain was paid than in former years; for while the drop in the initial payment on the top grades was 15 cents below the previous year's basis the drop on No. 6 and feed wheat was only five cents per bushel. Prices of the lower grades, therefore, did not decrease from the previous year's prices in the initial payments. In the same proportion as did the higher grades, even in the face of the very heavy deliveries of these lower grades which the Pool received."

The first interim payment on the 1928 crop was made by the Wheat Pool on March 1, last, when a flat payment of 12 cents per bushel was made on grades one to feed, with the exception of grade No. 6, on which the payment was 10 cents per bushel.

An interim payment amounting to over two and a half million dollars is also being distributed by the Coarse Grains Pools of Manitoba and Saskatchewan. An interim payment of 15 cents per bushel on 2 C.W. oats brings the Pool payment to the present to 55 cents per bushel, and 11½ cents payment on 3 C.W. oats brings the payment on that grade to 48½ cents per bushel. The interim payment on barley is 7½ cents per bushel, bringing the total to date on 3 C.W. barley up to 67½ cents. The interim payment on flax is 34 cents per bushel, No. 1 N.W. bringing the total to date up to \$1.96 per bushel. Interim payments on rye are 9 cents per bushel for Nos. 1 and 2 C.W., 9½ cents for No. 3 C.W., and 10 cents for rejected. Earlier payments amounted to 82 cents per bushel for Nos. 1 and 2 C.W.

Sentenced For Manslaughter

London, England.—Richard Joshua Steynolds, 25-year-old American, of the wealthy Reynolds tobacco manufacturing family, was sentenced to 18 months imprisonment without hard labor on a manslaughter charge growing out of an accident last May in which a motor cyclist was killed.

Progress Is Satisfactory

London, Eng.—Recent satisfactory progress toward an Anglo-American agreement on naval limitation has raised the belief in well-informed circles here that participation of other naval powers in the negotiations may not be delayed as long as previously was anticipated.

W. N. U. 197

Development In Aviation

Vancouver and Halifax May Be Linked By Air Route By 1931

Winnipeg.—Unprecedented development of aviation in Canada and the possibility of the Dominion realizing a transcontinental air mail service, linking Vancouver and Halifax by 1931, were heralded here by Major Gen. J. H. MacBrien, of Ottawa, president of the Aviation League of Canada.

Completing 1,500 miles of a solo flight from Ottawa, the famed Canadian flying "ace" piloted his little Gypsy Moth to a perfect landing at Stevenson Aerodrome, Winnipeg. General MacBrien is en route to the Pacific coast.

"Progress in Canadian aviation has been satisfactory," said Gen. MacBrien, "and a rapid development is taking place. Commercial aviation is growing steadily in Canada. New mail routes are being opened all the time, new flying clubs are being formed, and generally the situation is very promising."

Referring to the establishment of a transcontinental airway, Gen. MacBrien stressed the importance of perfect organization and pointed out that links were already started in both the east and west.

"Completion of the service will witness feeders being supplied from northern provincial districts such as Hudson Bay, Peace River, Northern Ontario and Quebec," he said, "and eventually the Dominion will boast of one of the most extensive and enterprising services in the world."

Increase Shown In Infantile Paralysis

Warning Sent Out From Ottawa To Guard Against Outbreak

Ottawa.—Telegrams went forward from Dr. J. A. Amyot, deputy minister of health in the Dominion Government, to all the deputy ministers of health in the provinces advising them that returns showed an increase in infantile paralysis and warning them that as the best method of dealing with the disease is to combat it by Dr. Helen MacMurphy, chief of the division of child welfare. It will be issued under instructions of Hon. Dr. King, Minister of Pensions and National Health.

A "blue book" is also being rushed through the Government printing bureau and will be widely distributed explaining the disease and how to combat it in the light of recent developments. The book has been written by Dr. Helen MacMurphy, chief of the division of child welfare. It will be issued under instructions of Hon. Dr. King, Minister of Pensions and National Health.

Some three years ago infantile paralysis was prevalent in California and other Pacific Coast states. British Columbia was not seriously affected. In 1927 it spread to Alberta where there were 354 cases. Last year it reached Manitoba where there were at least 435 cases. The increase noted is in Ontario. The department does not wish to frighten the public, but it does wish to advise them of a danger which may develop quickly because of the contagious nature of the disease.

Canada At League Assembly

Hon. W. D. Euler May Represent Dominion At Coming Meeting

Ottawa.—Canada will probably be represented at the coming meeting of the Assembly of the League of Nations by Hon. R. Dandurand, Hon. W. D. Euler, Minister of National Revenue, and another member of the Dominion Government. The selection of Canada's representatives will be made definitely at the next meeting of the Cabinet, it is understood.

Mr. Dandurand, who is Canada's representative on the Council of the League, will certainly go to the Assembly and it is understood that Mr. Euler will be one of his companions. Just who else will go is not known.

To Attend Labor Session

Ottawa.—Right Hon. J. H. Thomas, Lord Privy Seal, in charge of the unemployment situation under the Labor Government in Great Britain, has accepted the official invitation of the executive of the Trades and Labor Congress of Canada to be present at its convention which will be held at Saint John, N.B., during the week of August 26.

Edmonton Judge Holds Court At Aklavik

Travels 2,000 Miles To Teach Eskimo He Broke The Law

Aklavik, N.W.T.—A verdict of guilty of manslaughter was returned in the case of Okkhina, Eskimo, by a jury at Aklavik, recently, before His Honor Judge Dubou, of Edmonton. The trial was held at Aklavik, in the Northwest Territories, with judge and jury.

Okkhina, the Bathurst Inlet Eskimo, was found guilty of murdering Oosuk, another Eskimo; in the fall of 1927.

The jury considered for two hours and brought in a verdict of manslaughter, through their foreman, Dr. A. Truesdell. Okkhina was sentenced to one year's imprisonment at Herschel Island.

This is the end of this year's judicial party's journey to the north to bring to the Eskimos two thousand miles from Edmonton that British fair play and justice for which the British empire has fought through centuries.

Ontario Election Predicted

Toronto.—The Mail and Empire (Conservative) says:

"A Conservative high in the official councils of his party in Toronto confidently predicted to the Mail and Empire that Premier Ferguson would go to the country early in November. The date would be in the first half of the month, because, he said, there was a strong feeling among the leaders, including the premier, against anything approaching winter campaigning."

CELEBRATE DOMINION DAY IN JAPAN

The photograph here shows a scene at the new Canadian Legation in Tokyo, Japan, on last Dominion Day, when celebrations, its first public function, were conducted in the grounds and the Canadian flag was officially raised for the first time in the Orient.

Cotton Strike Still Far From Settlement

Powerful Weaving Branch Refuses To Consider Wage Reduction

Manchester, Eng.—Lancashire's cotton mill stoppage continues with prospects sadder than ever for an immediate settlement and return to work of its striking operatives.

The employers professed still to be ready to negotiate for a solution of the dispute and the card room workers and spinners seen prepared to negotiate with them, but the powerful weaving branch was determined to remain adamant in opposition to the proposed wage reductions.

Meanwhile a section of the British press commented on the serious loss to British industry growing out of the stoppage as a consequence of the opportunity it gave rivals to seize the national trade.

Germany, France and Japan were reported in these quarters as optimistic over the opportunities presented. The Mail declared northern France would reap a golden harvest, orders which ordinarily would go to Lancashire going to Lille, Roubaix and Tourcoing. The paper said the French textile mills were working at top speed.

The Express printed an article by an unnamed authority, attacking the obsolete organization of the cotton industry, which the writer said, is still bound by the methods of 60 years ago, absurd under present conditions.

To Form Canadian Geographical Society

Will Aim To Make This Country Better Known To Canadians

Ottawa.—A national board of directors has been elected as a first step in establishing the Canadian Geographical Society aimed at making his country better known to Canadians and to those outside the Dominion. The society intends to issue a magazine.

The directors are: Dr. W. B. Brock, University of British Columbia; Dr. R. C. Wallace, president University of Alberta; Dr. W. C. Murray, president University of Saskatchewan; J. W. Datoe, managing editor Manitoba Free Press, and Dr. Charles Cannell, Deputy Minister of Mines.

Admits Bank Robbery

Smithers, B.C.—James Wesley Burke, captured recently after a two weeks' man hunt, has confessed to robbing the Royal Bank here of more than two thousand dollars on July 17. He was committed for trial on a charge of robbery with violence. Practically all the money taken has been recovered.

WESTERN PORT IS LEADING IN GRAIN SHIPMENTS

Ottawa.—Vancouver leads the country in grain export with a volume of 64,233,652 bushels passing through the port up to the end of the first six months of the calendar year, commencing June 1, according to figures compiled by the harbor commissioners for the port. Montreal exported 43,549,140; Saint John, 22,622,984, and Quebec, 3,587,273 bushels of grain. No exports of this commodity passed through St. John in May or June, the opening of navigation resulting in a transference of that business to Montreal, whose figures for the year begin with the month of May.

The volume for Halifax is not available, but it is known to be considerably greater than last year. Grain from the United States furnished more than fifty per cent. of St. John's exports. American exporters shipping 12,281,999 bushels against 10,341,054 bushels Canadian grain. This quantity of the American commodity was greater in the first four months of the current year than in the whole of 1928.

Last calendar year Montreal shipped 211,205,939 bushels, of which 165,099,958 was Canadian grain and 62,995,421 American. Vancouver shipped 97,250,548 bushels, all Canadian grain. Vancouver's exports increased by 55,235,521 bushels over 1927 and Montreal's by 16,047,463 bushels.

Making Secret Trip In Moth Airplane

Believe Machine Going North For Mineral Exploration Purposes

The Pas, Man.—A secret trip to the Northwest in a moth plane is underway with Capt. W. N. Sherlock, of Dominion Explorers' aerial staff, at the controls. The flyer hopped off from here for Lac La Ronge, in northern Saskatchewan. While the aviator refused to discuss his trip, it is stated in mining circles that the machine will be taken into the far North for mineral exploration purposes.

If successful, the venture will likely set a new Canadian record for light planes of the moth biplane type. Most of the country over which the machine is flying is remote from habitation and a forced landing en route would place the pilot in grave danger.

Rain Mars Opening Of Scout Gathering

Downpour Drenched Thousands Who Attended Rally In England

Arrow Park, England.—Drenching rain pelted the international gathering of 50,000 boys of the Boy Scouts' World Jambores as the gates opened to civilians flocking to witness the formal opening of the great rally by the Duke of Connaught. The Scout answer to the downpour was to break out in raincoats and slickers of all kinds and to carry on with cheers.

The gathering of the troops of boys from 42 nations on the parade ground for the rally, however, developed into a very damp job.

Two Killed By Explosion

Metal and Tank Blown 200 Feet Into Air

Trail, B.C.—Two men were killed almost instantly and a third injured when an acetylene gas tank exploded in the acetylene burner shop of the Consolidated Reduction plant here.

The explosion threw metal 200 feet into the air. The tank itself rose to that height and came crashing back through the roof of the gate house, doing damage there.

Tax Receipts Larger

Ottawa.—Income tax receipts for the first quarter of the present fiscal year (ending June 30) totalled \$54,635,317 over the corresponding quarter of 1928, according to the Minister of National Revenue. The gain is attributed to larger incomes received and to more strenuous efforts in the collection of the taxes.

Inga Municipal District, ~
NO. 520.

PUBLIC NOTICE is hereby giv-
en that there has been introduced
in the Council of the Municipal
District of Inga No. 520 a Bylaw
of which the following is a short
 synopsis:

This bylaw provides that all
domestic animals shall be permit-
ted to run at large in Divisions
Four (4) and Two (2) of the Mun-
icipal District of Inga No. 520.

And that a copy of the same
may be seen at each of the follow-
ing places—

In Division 2—
Brightbank Postoffice,
NE. Corner NE. 36-51 2-5,
Lucknow School Corner,
NE. Corner NE. 31-51 2-5,
SE. Corner SE. 16-51 2-5.

In Division 4—
Duffield Postoffice,
NW. Corner NW. 11 53-3-5,
Wabamun Postoffice.

And further that unless within
thirty days from the publication
of this notice at least ten (10) re-
sident electors from Division Two
and six (6) resident electors from
Division Four petition the Council
to submit such bylaw to the vote
of the resident electors of Divi-
sions Two and Four respectively,
the Council will proceed to pass
the same.

Dated at Stony Plain this 25th
day of July, 1928.

The ancient art of goat-petting
is in full swing at Banff with 25
wild Rocky Mountain goats trapped
in June and nearly the same num-
ber in July. They are enticed
into traps by salt licks of which
they are inordinately fond. Some
are to add to the wild life of Cali-
fornia; others are for exhibition
purposes and for zoos.

Concrete work on the new Saint
John elevator has commenced and
will require about 25,000 cubic
yards of concrete. Grain business
through Maritime Provinces ports
is growing largely every year.

Statistics gathered by the New
Brunswick Government Bureau of
Information and Tourist Travel
show an increase of 25 per cent in
the number of motor tourists from
the United States entering Canada
at border points of this Province
for vacations.

Word has been received by J. M.
Gibson, general publicity agent,
Canadian Pacific Railway, that His
Excellency the Governor-General of
Canada, will extend his patronage
to the Canadian Pacific series of
six concert tours of British and
Canadian music to give across
Canada, commencing in the fall of
this year and continuing until the
spring of 1930.

Products of the fisheries of Cana-
da in 1928 had a total value of
\$4,971,219, an increase of \$2,474-
281 compared with 1927. These
figures comprise the value as mar-
keted, whether sold for consump-
tion fresh or canned, cured or oth-
erwise prepared. The salmon
fishery is the most important, with
a total value in 1928 of \$17,867,053.

The Canadian Women's Press
Club, consisting of 100 delegates
came by Dominion Atlantic Rail-
way special to Digby recently,
stopping at Annapolis Royal and
Grand Pre en route. A number of
outstanding writers were in the
party and all expressed their ad-
miration of the Evangeline Country
and the Annapolis Valley.

A notable beauty spot is being
recalled to public notice this sum-
mer by the Alpine Club of Canada
which is holding its annual camp
from July 15 to July 20 on the site
of the old railway village of Rogers
Pass near Glacier, B.C., at the west-
ern opening of the Coanought Tun-
nel on the main line of the Cana-
dian Pacific Railway. The camp
commands a magnificent view em-
bracing Mount Sir Donald, Mount
Macdonald and Tupper, the Ille-
cillewaet Glacier and many other
fine ranges and valleys.

On the first anniversary of their
wedding, Mr. and Mrs. Cornelius
Vanderbilt, Jr., recently left the
Banff Springs Hotel in the Cana-
dian Rockies for a motor trip
through western Canada. He was
most enthusiastic about the roads,
scenery and accommodation in the
Rockies.

IT PAYS TO PAY CASH.

Wong York left on Friday, to visit his family in Hong Kong, his last visit there being made in 1922.

Mr J Christie was the prosecutor in a case in an Edmonton Court, on Tuesday, where a young man had failed to pay his board bill.

The Town Council held its regular monthly meeting on Monday night.

Local hockeyists are arranging to have the boundaries of the ice rink extended, and work on this will begin at once.

On Sunday last a four-day Mission was commenced by Rev M Schnitzler of Spring Lake, at St Philip's church. Sermons were given in English and German. The devotions were well attended.

Stony's express motortrucks did not make their regular trips to the City on Monday, it being Edmonton's Civic holiday.

The very welcome showers over the week-end, while not saturating the ground as much as was needed, have done a lot of good to the oats and barley.

At the Bar

Tuesday was a busy day for Magistrate Williams.

The case of Nick Pasemko against Joe Putschkerra for assault was settled in an amicable manner.

A big part of the time of the Court was taken up evidence in the case under the V. & H.T. Act, wherein John Bauer received damage to his touring car thru a collision, while traveling along the Baseline. The case was started last week, and been adjourned to allow the defence to bring on more witnesses. After the evidence was in, an adjournment was given, for one week.

Mr Thos White, a barrister from Holden, appeared for Mr Geo Meisner, whose case was adjourned for a week.

Benefits by Being Insured.

Mr Bernard Miller, a Blueberry farmer, who recently suffered the complete destruction of his dwelling house by fire, has secured a settlement of the loss which fully satisfies his claim. The policy was put thru by Mr Geo F Harris, the well-known insurance agent. Mr Miller's policy had run less than a year when the fire occurred.

Address to Walther Leaguers

Prof. Englebrecht, of St. Louis, field secretary of the Walther League, gave a very interesting address, Sunday evening, at the St Matthew's Schoolhouse No. 2, on the aims and objects of the Walther League. His address was interspersed with facts and figures of the growth of and the good work accomplished by the League since its inception. He stated that at the recent convention in St. Louis of the League there were present delegates to the number of 15,000.

Edmonton Beach.

Mr Val Kulak, of the Enders Department Store, is spending a short vacation at the Beach.

Mr Kowensky and family are now occupying their cottage here.

Stony Plain Walther League have rented the Lawrence Wight cottage for August, and the members are having a very pleasant time.

The cottages here are all occupied at present, with accommodation in other quarters at a premium.

Walther League Conference.

On Aug. 2 and 3 Walther Leaguers from many societies of the Alberta and B. C. District assembled at Edmonton Beach for their annual conference. The local society attended to all preliminary arrangements, such as providing sleeping quarters, food, cooks, hall for lectures, entertainments etc. Prof. Englebrecht of Concordia College, River Forest, field secretary of the International Walther League, attended the sessions.

Rev Boettcher of Edmonton showed his usual interest in young people's work, giving several reports as well as leading the discussions.

The election of officers for the District for the coming year resulted—

Pres., Val Kulak.
V-Pres., Mathildr Enders
Treas. R Schneider, Edmonton
Sec., Amanda Lechelt, Niaku
Field Sec. Rev Nissen, Didsbury
Hospice Sec., Hilda Rosnan, Bruderheim.

Walther League News.

The regular monthly business meeting of the local society was held July 31. Among other matters, it was decided to have a membership campaign in the near future. There will be a young people's rally early in September, to which all young people are heartily invited.

A large sign for the St Matthew church has been made by Mr P. Enders. Other signs will be placed at the Beach-Meridian corner and in Stony Plain.

Spruce Grove News

Mr Ralph Schultz, who had been studying at a Saskatchewan college, returned here last week.

Wm Callahan, who sold his live stock, implements, and household goods last week, is moving to the Coast as soon as his business engagements permit.

Butcher MacKean has secured the contract for supplying veal T bone steaks to one of Edmonton's largest hotels.

Contractor Furlong finished his work on the Baseline and moved his outfit to Unity, Sask., on Saturday. Two of the sub contractors moved to Evansburg district.

Napoleon Gagne holds the record for the first cutting of wheat in central and northern Alberta. A sample of the grain was graded as a good No. 2 by a local elevatorman. The field is expected to average 20 bu. to the acre.

The farmer's best friend is The Family Herald and Weekly Star, Montreal. It costs only a dollar a year.
